

Space Sensor Guard

Features

- Robust construction
- Easy fixing

Specification

Material	Powered coated mid steel
Dimensions	See page 2
Fixing centres	4 x 4.2 mm \varnothing on centres 112mm (W) x 84mm (D)

Product Codes

TT-GD
Sensor guard

Technical Overview

The TT-GD guard is designed to protect the TT-915, TT-911 and TT-1000 range of sensors.

A typical installation would be a sports hall where a TT-915 would be used to measure the radiant heat, and the guard would protect the sensor from being damaged accidentally.
